Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claim 1-34, drawn to peptide forming enzymes of SEQ ID NO: 15 and 17, encoding DNA molecules of SEQ ID NO: 14 and 16, expression vectors, host cells method of recombinant production of said enzyme and the method of use of transformants for production of dipeptide, classified in class 435, subclass 69.1.
- II. Claim 35-46, drawn to a method for producing a dipeptide by proline iminopeptidase in vitro, classified in class 435, subclass 68.1.
- III. Claim 47-48, drawn to a method of using a culture of a microbe for producing a dipeptide, classified in class 435, subclass 41.

Inventions I-III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are three methods of producing dipeptides, said methods having different methods of operation and are not disclosed as capable of use together.

Inventions I-III are distinct for the reasons given above and have acquired a separate status in the art. Because of their recognized divergent subject matter and/or different classification, restriction for examination purposes as indicated is proper.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one

Art Unit: 1652

or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
